Summary

Blending creativity with technology, I specialize in graphic design, web development, 3D modelling, and UI/UX design, while also working with Python, Power BI, and automation tools. Over three years of BCA in AR/VR, I have developed projects that reflect my passion for design, innovation, and intelligent digital solutions.

Experience

May2025–
June2025

Limited

Power BI and Automation Intern

Gained hands-on experience in data analytics and automation by working extensively with Microsoft Power BI and other automation tools. My primary focus was on designing, developing, and deploying real-time dashboards to visualize business-critical data effectively. I learned to work with data modelling, DAX functions, Power Query, and various visualization techniques to enhance data interpretation and user engagement.

Projects

- **Samsarah (VR Experience):** Built a 3D VR learning environment of Earth & solar system using Unity & Blender.
- **Personal Finance Tracker:** Developed a MERN stack web app for expense tracking, savings tips & investment insights.
- **Tic Tac Toe Game:** Created an interactive 2-player web game using HTML, CSS & JavaScript.
- **Indie Utsav:** Designed a cultural website showcasing Indian festivals with detailed insights.
- **Text to Podcast:** Developed an AI-based tool converting text into audio using Python (NLP & TTS).
- **Chronos:** Built a wellness web app for diet tracking, hydration & productivity management.
